Health Office Clearance procedure for new Dormitory Students.
(Revised April 1998)

THESE MINIMUM IMMUNISATION REQUIREMENTS, OR A LEGITIMATE
WAIVER ARE A CONDITION OF ATTENDANCE IN DoD DEPENDENT SCHOOLS

Immunisation	Minimum Bahrain School Requirement (updated April 1998)
Oral Polio Trivalent	3 doses of trivalent, at least one of which was administered after 4th birthday.
Diphtheria Tetanus Pertussis*	3 doses of trivalent, at least one of which was administered after the 4th birthday and last dose was given within the last 10 years. Pertussis not required after 7th Birthday
Measles (Rubeola) Mumps Rubella	Two doses of live attenuated vaccine, given singly or in combination on or after 15 months of age and with a minimum 4 week interval between doses. OR A serological test proving evidence of any detectable antibodies for Measles, Mumps and Rubella.
Varicella (Chickenpox)	Students who have a reliable history of Chickenpox disease do not need to be immunized if they can provide a physician's statement giving month and year of disease. Students up to age 12 must receive a basic series of one dose of Varicella vaccine. Students 13 years and older must receive a basic series of two doses of Varicella at least one month apart.
Hepatitis B	Series of three doses for those not vaccinated in infancy. The second and third doses should be administered one month and 6 months respectively after the first dose.
IPPD Mantoux	Test results must be expressed in millimeters of induration. Terms Negative/Positive are not accepted. Students who test positive (10mm induration) are required to: a) Complete a course of prophylactic INH <u>OR</u> b) Present proof of a normal chest x-ray in the form of an official radiology report. Proof of BCG vaccine within the last three years will be accepted in lieu of a Mantoux test.
